INCOMETRIC FUND - EQUAM GLOBAL VALUE D, EUR

A Sub-Fund of Incometric Fund, ISIN LU1274584991
This Fund is managed by Adepa Asset Management S.A.

Objectives and Investment Policy

The Investment Objective of the Sub-Fund is to achieve mid-term capital appreciation. The Sub-Fund seeks to accomplish this objective through investing primarily in equity and fixed income mainly issued in OECD countries. The Sub-Fund will be managed following a total return strategy.

The portfolio allocation will be based on microeconomic and macroeconomic environment indicators to identify investment opportunities. The Sub-Fund is expected to obtain the majority of the return from equities. However, investments in fixed income securities and other assets classes will also be employed to diversify the sources of return and risk. The Sub-Fund will be mainly invested in equities, equity-linked instruments (including but not limited to ordinary or preferred shares, convertibles bonds) and in bonds (including but not limited to fixed-rate

or floating securities, zero-coupon bonds and treasury bonds) and money market instruments issued or dealt on the Eurozone and other international regulated markets. The Sub-Fund will not invest more than 10% of its net assets in ETFs or other investment funds.

The Sub-Fund will capitalise its entire earnings following an income accumulation policy.

The Share Class' currency is EUR. The Sub-Fund's reference currency is EUR.

The aforementioned investment strategy corresponds for the investors to a high investment risk.

The investors are able to redeem their units on a daily basis.

Risk and Reward Profile

The risk/return indicator shows the correlation between risk and returns. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'.

The risk category of the Sub-Fund is 5 and is calculated from historical data or simulated historical data of the underlying securities when the real data is not sufficient. Past performance is not necessarily a reliable indicator of the Sub-Fund's future risk and reward profile.

The following risks may materially impact the Sub-Fund but are not captured by the indicator:

Credit risk: The default of the issuer of a debt instrument held by the Sub-Fund.

Liquidity risk: Securities in the Sub-Fund may be sold below their valuation due to insufficient liquidity in the market.

Counterparty risk: A counterpart may fail paying the proceeds related to the sale of securities by the Sub-Fund or may fail delivering the securities purchased by the Sub-Fund. A counterpart of the Sub-Fund in an OTC derivative may fail satisfying its obligations towards the Sub-Fund at any event of the OTC derivative agreement.

Operational risk: Failures or delays in operational processes may negatively affect the Sub-Fund.

Derivatives risk: Derivatives may be used to increase, lower or maintain the risk level of the Sub-Fund. The derivative strategy may fail resulting in significant losses for the Sub-Fund.

Currency risk: Exchange rate fluctuations may negatively affect the value of the Sub-Fund's investments.

Event Risk: The overall value of all types of investments may be affected by devaluations, political and governmental interventions in relevant markets or irregular and sudden market fluctuations.

The above mentioned list of risk factors is not exhaustive. Other factors may influence the pricing of the underlying securities and therefore the value of the Sub-Fund's investments.

Charges for this fund

One-off charges taken before or after you invest
